ORD 0569-68

29 January 1968

MEMORANDUM FOR: Chief, Technical Services Division/DDP

SUBJECT : ORD/TSD Program Coordination

1. In accordance with our original plan, we have now completed the direct interface meetings between ORD and TSD technical representatives. A series of draft papers were written by the technical officers which are summarized in the attached. Attachment 1 is the TSD-prepared understanding of the results of these meetings, and Attachment 2 is the ORD-prepared understanding. They have been reviewed together and appear to be highly consistent although there are some minor discrepancies in your program areas of Audio Surveillance and Behavioral Sciences.

2. We understand that your highest priority programs are Audio Surveillance, Visual Surveillance, Chemical Surveillance and [redacted] Perhaps we can review these coordinated programs and clarify any minor points of difference at our meeting scheduled for 6 February 1968.

3. Although this coordination has required a great deal of time and effort on the part of both offices, I hope the results will lead to improved relationships and a continuing close dialogue between the technical officers in our offices.

[redacted]
